### 911 Outages/Remote/Community Isolations:

- None reported.

### Service Interruptions:

- None reported.

# WEATHER OF CONCERN

## Weather of Concern

- A Red Flag Warning is in effect for the Kern County mountains through 2200 hours Sunday evening. A combination of prolonged low minimum relative humidity values and very dry fuels will create critical fire weather conditions.
- A dry air mass in place across the area will bring freeze conditions to the Ojai Valley in Ventura County, along with widespread frost across the Central Coast into mid-morning Sunday.
- **Active Weather Warnings, Watches and Advisories by County:**
- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

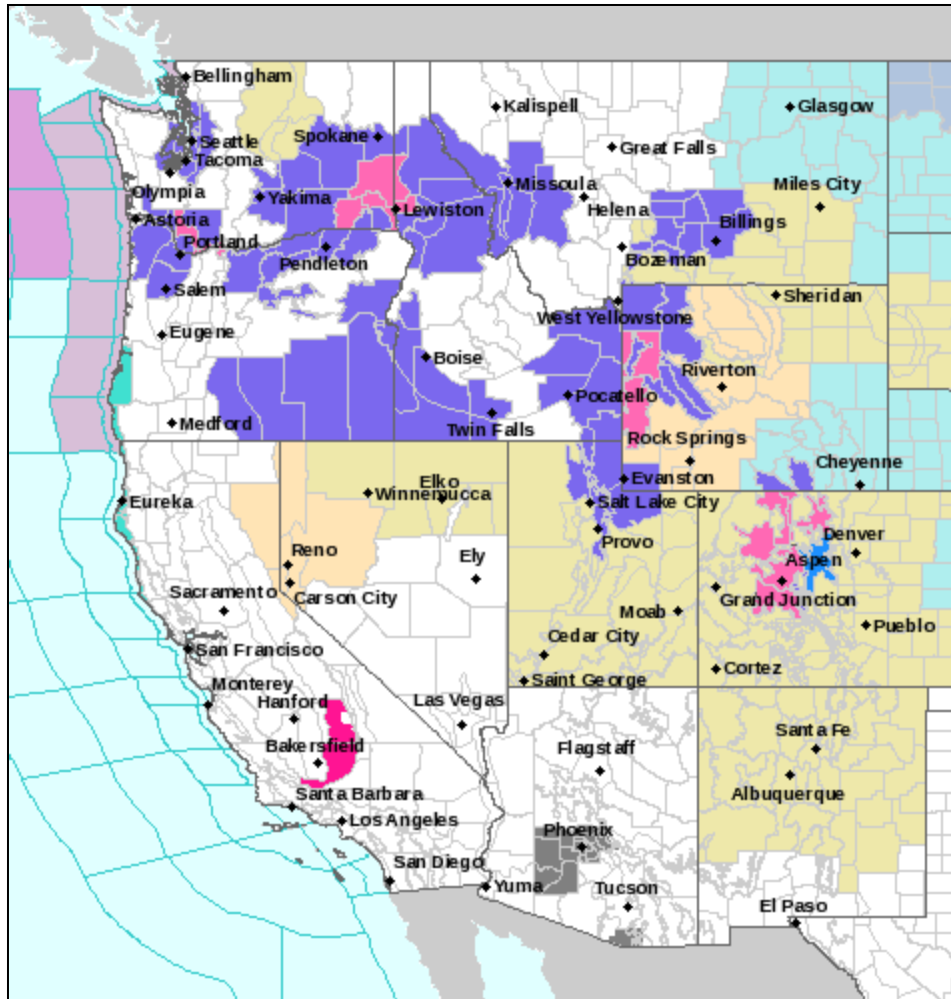

On Sunday a bit more cloud cover will lead to a slight chance of rain and mountain snow over the northern half of the region in the afternoon and evening. Temperatures will be near to slightly warmer than normal. By early Christmas Day clouds will be clearing out and locally gusty N-NE winds will bring lower relative humidity (RH) to areas from the western Sierra-Cascade slopes to the coastal range. Peak gusts will be 20-30 mph in wind-prone locations. From Tuesday through next Friday mostly dry weather will prevail with warmer than normal temperatures and occasional light N-NE downslope winds.

## **SOUTHERN CALIFORNIA**

A ridge of high pressure will overspread the area, leading to warmer and less windy weather the next few days. But there will be some moisture in the mid and high levels of the atmosphere, resulting in partly cloudy skies through Monday. Temperatures will warm to a few degrees above normal over the mountains westward to the coast while the desert remain chilly. Sunday and Monday will be the warmest days with highs reaching the 50s in the mountains to the 70s at lower elevations of Southern California. There may be some night through morning low clouds along the coast from Long Beach southward as well as fog in the San Joaquin Valley through Monday. A weak trough will bring a bit of cooling Tuesday and Wednesday. Offshore flow may return next Thursday and Friday, but at this time, winds are not expected be strong with this event. Warmer weather will return next weekend. Expect minimum relative humidity (RH) to fall into the 10-15% each day across the central coast and much of Southern California. No rain is expected through at least the 31st and probably through the first week of January.
